Project Presentation Guidelines
December 1-4 (random assignment, check slides on website for your day)

You will have eight minutes to deliver your presentation to the class. Following your presentation will be a two-minute period for questions. Please create some sort of visual aid (e.g., power point, prezi, etc.). Keep visual aids simple and uncluttered. Use color for contrast, but use it in moderation. Resist the temptation to use sound effects and dramatic slide transitions. The sections that you choose to present are flexible but generally order your sections as follows: Introduction, Methods, Results, Conclusions, and Implications. Use pictures, maps, and figures to tell your story. Be prepared to stand and deliver your presentation to the class. Ask questions of your peers at the end of their presentations. Everyone is expected to contribute constructive feedback to peers.
