

CROSS CULTURAL COMMUNICATION: COMMUNITIES & CONSERVATION

FURTHER READING

To prepare for the workshop, readings available on course reserve (<http://library.tamu.edu>) are listed in the syllabus. Participants are expected to pick 3 of these readings and to dialogue about them using the elearning discussion tool. As supplemental materials, this list is provided for participants who want to continue reading and learning more about issues that arise during and after the workshop. We find that the suitability of each reading depends on the cultural model and disciplinary focus of each reader. For example, biologists typically find it overwhelming to read the lengthy, nuanced, jargon-filled articles of anthropologists. The columns on the right of this list provide information to help you sort which articles will best help you meet your personal learning goals. We welcome suggestions for further reading.
