RESEARCH PARTICIPANTS NEEDED

The ADALAB (Advanced Data Analysis Lab) of Computer Science Department of the Texas A&M University - Commerce is looking for volunteers between the ages of 18-30 to participate in a research study of brain waves.

The study involves EEG (electroencephalography) recordings. The actual recording is only approximately 10 minutes. The experiment setup, including signing of consent forms, will take approximately 20-30 minutes. Participants will be shown various images during the EEG recording session and the brain EEG waves will be recorded. The total duration of the experiment will be at most 1 hour. It will take place in ADALab, at the Computer Science Department located at room Jour203.

Participants will be paid $10 for participating.

**EEG recording will be done through an advanced, wireless, safe, non-invasive (dry-contact, no gels involved) device.**

For information contact Mr. Raju Jampana at sjampana@leomail.tamuc.edu and 903-886-5619.

This experiment is part of a research grant provided by TAMUC Office of Research and Sponsored Programs awarded to the principal investigator:

Unal "Zak" Sakoglu, PhD
Assistant Professor, Computer Science Department
Coordinator, Computational Science Program
