

TSAPS Student Presentation Award Competition

The Texas Section of the American Physical Society supports from its operating fund a competition for the best undergraduate and graduate students presentations at the annual Fall meeting, with \$200 awards.

1. Only papers presented in the APS contributed paper sessions. Presentations with AAPT or SPS abstracts ARE NOT ELIGIBLE.
2. Students may compete in only one paper; typically only one APS abstract is accepted with the same first author.
3. All students presenting APS session papers are encouraged to compete for a presentation award.

Requirements for TSAPS Student Presentation Award

1. On the electronic APS abstract form, students must be listed as the first author and presenter of the paper. The deadline for submitting an APS abstract is Friday, September 28, 2007.
2. In the "Special Instructions" line, students must enter "Graduate competition" or "Undergraduate competition", as appropriate. If you do not indicate there that you are competing for an award, your paper will not be judged.
3. Students must (a) pre-register for the meeting by the deadline of Friday, October 5, 2007, and (b) indicate that they are competing for an award on the Registration Form.

NOTE

1. Student mailing address and e-mail address must be on both the electronic abstract form and the pre-registration form.
2. A student may submit several papers, but may compete on only one paper, which must be indicated on the registration and abstract forms.
3. Chair-Elect Dr. Dave Hough (dhough@trinity.edu) is coordinating the judging of the presentation awards. For questions about the award programs, contact him.
